(74.56%)

---

## PROJECT'S

**Employee Management System - using JAVA, GUI, and Windows Builder. (01/2023 - 02/2023)**

- It is a Desktop Application.
- Employee Management System is a distributed application, developed to maintain the details of employees working in any organization. It maintains information about the personal details of its employees.
- The organization keeps the record of all the employees on paper, which is not a secure way of maintaining the data.
- An organization can use this application to maintain their employee's details securely. The software is very user-friendly. It's easy to maintain.

**Dynamic Web Page - using HTML, CSS, and JavaScript. (02/2023 - 03/2023)**

- The web page is "Travel Guide".
- It manages all the information about travel facilities. There you can see all the details about the tour & travel.
- Github Link :- <https://shrikantdhepe.github.io/Travel-Guide/>

**Web Application - using JAVA, JSP, MySQL, HTML & CSS. (03/2023 - 04/2023)**

- It is a Student Management System Web application project.
  - This is a simple web-application that allows you to add, delete or update the student's data.
  - This system exists to simplify information tracking for both students and administrative staff.
-
